NEW CY416 IC CYLINDER

Abloy introduces their long awaited IC cylinder, the CY416.
This cylinder is the same dimension as the Yale LF large format dimension.
It will also retro fit into the ILCO L1000 series LR1021M (Medeco).
This cylinder can be keyed into Abloy Protec and soon into Abloy Disklock PRO systems.
The control key can be ordered at any key level.
There are no additional parts added to the cylinder combination in this IC system.
